

# TI Pro v5.6.106 Release Notes

*What we've been up to on the journey of providing the best market tools in the world.*

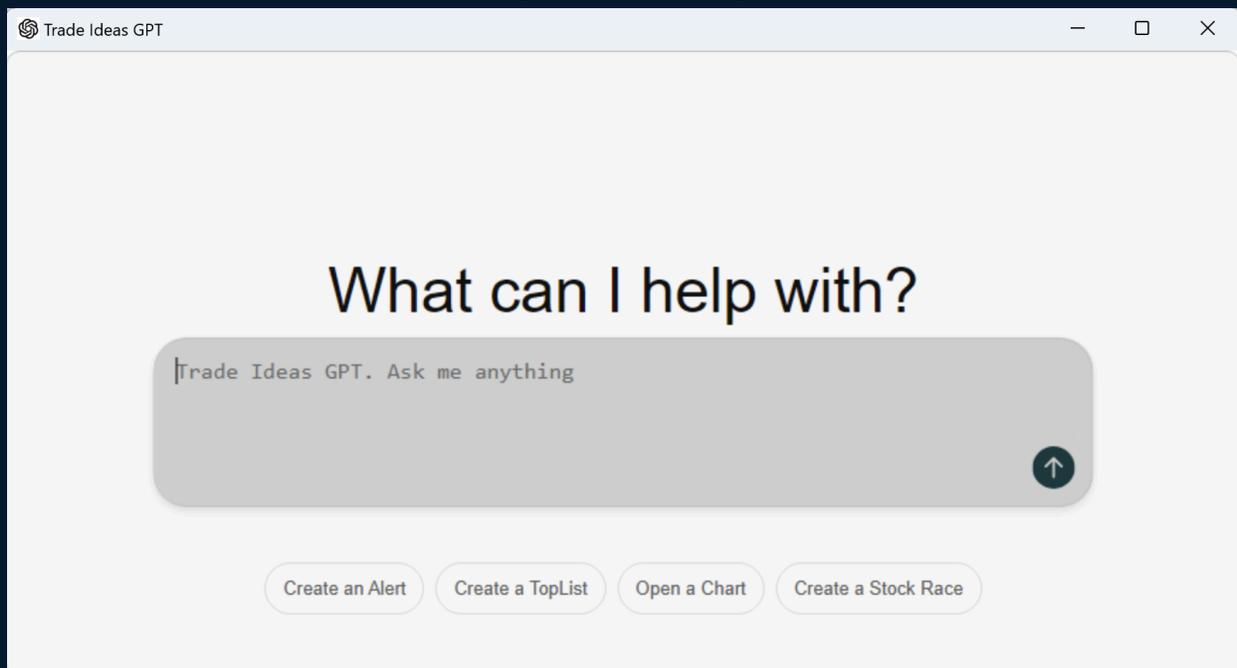

---

**Changes in Version 5.6.106, since the release 5.6.105:**

## 🔥 New Features 🔥

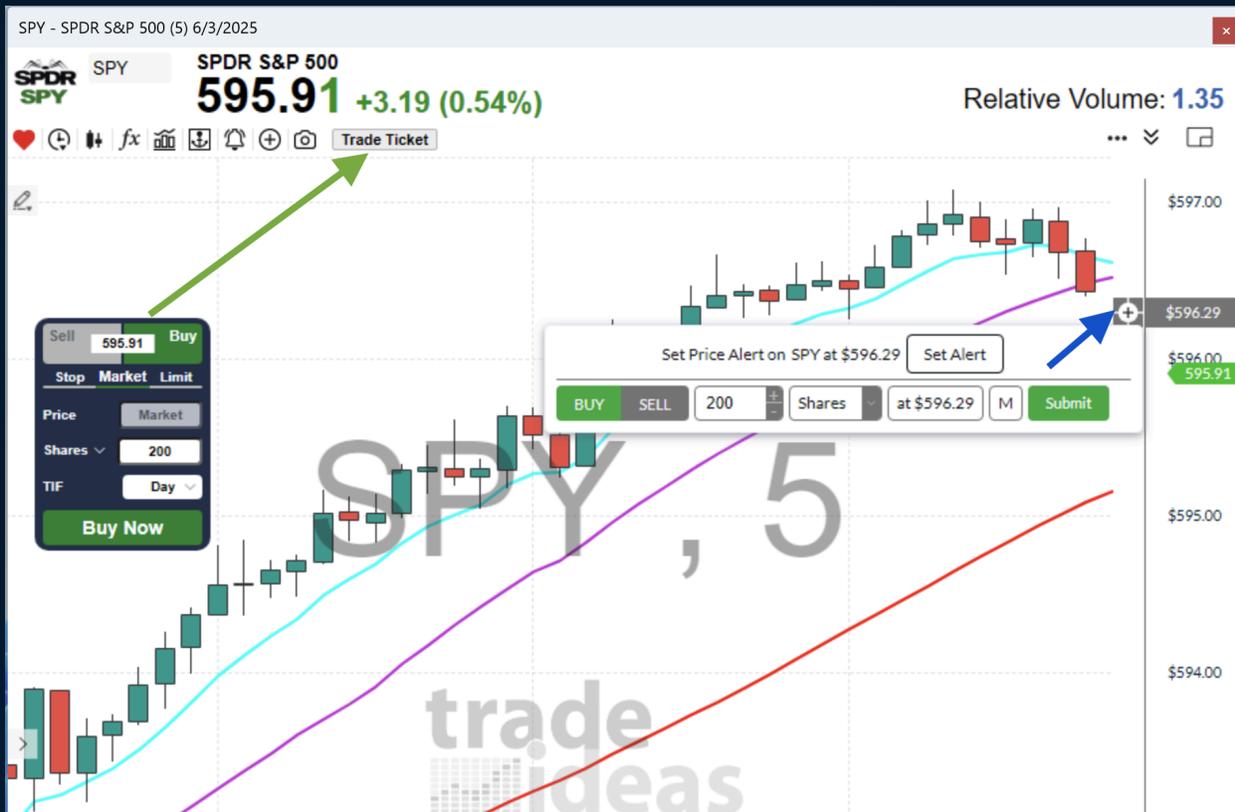

### GPT Help Window

- *Use our AI-driven chat window to help navigate TI Pro, select window filters or alerts, and more!*
- *Our GPT chat is now available within TI Pro in a few locations*
  - *New > GPT Chat Window*
  - *GPT button in the config window for Top Lists, Alerts, Multi Strats*

### Chart Order Entry Ticket

- *The order entry ticket is now available on charts within TI Pro when using the browser interface*
  - *The form is shown by selecting the "Trade Ticket" button towards the top of the chart*
  - *An abbreviated form is also available now through the "+" menu on the y-axis*
- *Settings can be found under the ellipsis (...) menu on the charts*

## 🦷 Improvements 🦷

- In addition to the new abbreviated order entry ticket, the “+” menu, found on the y-axis of the charts can be used for adding price alerts.

## 🐛 Bug Fixes 🐛

- Addressed a bug that would get in the way of connecting to E-trade when there were non-equity positions present in the user's portfolio.
- Addressed a bug that could cause ongoing PnL values to fall out of sync.
